

Name: _____

Following the Scientific Method in Art Production

Make an Observation:

List the materials you have been provided?

Ask a Question:

How do you think your group can construct the assigned project with these materials?

List, in steps, your group's approach.

Form a Hypothesis:

What do you think will happen? Will it work? To what degree of accuracy?

Conduct an Experiment:

List any changes or updates your group made during the experimental process to your planned steps.

Analyze your Data:

Recorded your results. What happened? Did it work/not work? To what degree and why?

Accept or Reject the planned Hypothesis:
